## What is SQT<sup>®</sup> Spongilla Spicules?

### Spongilla Spicules

**INCI Name:** Hydrolyzed Sponge

(Common names: Sponge Extract, sponge spicule, spongilla powder, etc.)

**Latin Name:** Spongilla fragilis Lecidy

**INCI No:** 06306

Collected Natural Freshwater  
Sponge from the Dongjiang Lake

60 hours Far-Infrared  
Vertical Drying Oven

Extract the natural  
siliceous microneedles

SQT Spongilla Spicules

## NATURE MICRONEEDLE

Non-chemical ingredients added, non-chemical synthesis, non-artificial production.

## Spongilla Spicules

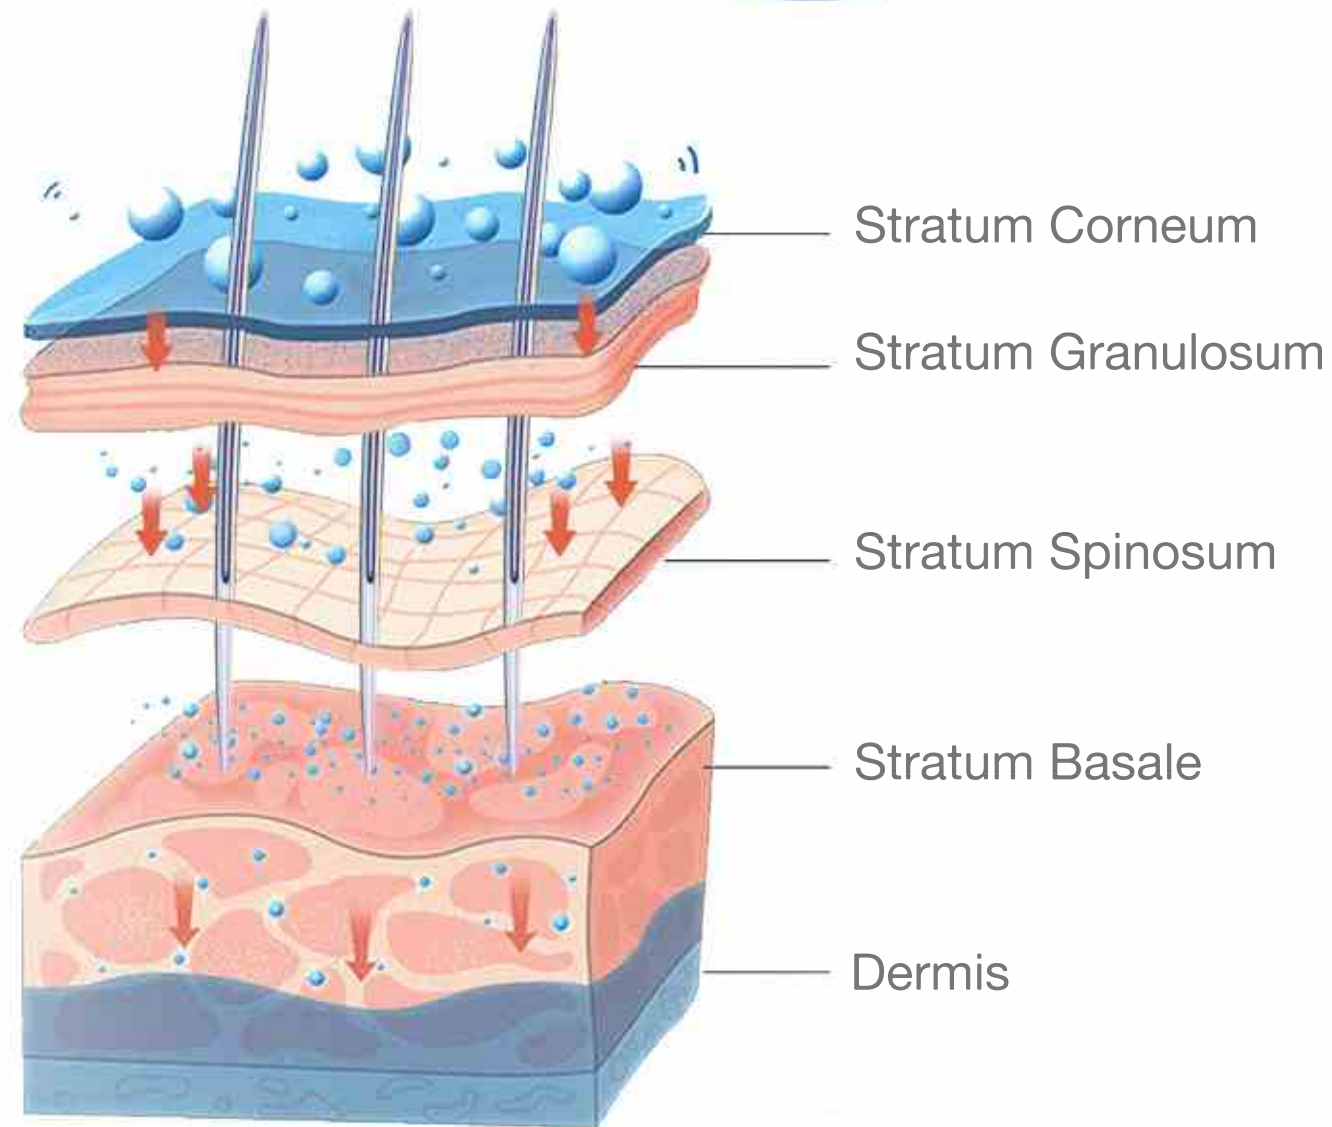

- SQT® Spongilla Spicules is a kind of siliceous bio microneedles that is extracted from the freshwater sponge.
- It can be seen as powder by our eyes, and as sharp rod crystal or blunt bone needles under the microscope. Spongilla spicules are generally 200-250um in length and around 10um in diameter.
- SQT® Spongilla Spicules is the core product of Sunshine Bio-Tech. Hunan Sunshine Bio-Tech Co., Ltd. is the pioneer of hydrolyzed sponge purification and extraction, with 9 years of dedicated R&D and production, we deeply polish each bio microneedle to provide the highest quality spongilla spicules for the cosmetic industry.

## What is the SQT® Spongilla Therapy?

**5 MINS**  
Quick access

**3,000,000**  
Microchannels

## Spongilla Spicules Therapy

- In just 5 Minutes, 3,000,000 natural siliceous microneedles are directly introduced into the demis layer through hand massage to promote skin metabolism and stimulate collagen regeneration.
- No bleeding, no anesthesia, and no skin breakage. Shortens the skin renewal cycle from 28 days to 7 days, and achieves natural, safe, and effective physical rejuvenation.
- Flaking or peeling can be expected depending on the esthetician's level of penetration. Spongilla spicules will not be absorbed but they can last in the skin for up to 48~72 hours. After 48 -72 hours they will be discharged with the stratum corneum that has fallen off.

# Spongilla Spicules Therapy

Spicule Implanting

Basal Activating

Collagen Reproduce

Epidermis Repair

Metabolic Renewal

New Skin

# Spongilla Spicules Therapy

● Compared with a traditional metal microneedle, the procedure is much easier and the risk of infection is greatly reduced.

● Compared with chemical peeling and herbal peeling, SQT<sup>®</sup> spongilla spicules therapy has NO SIDE EFFECTS, is suitable for all skin types, because the ingredients are all natural, doesn't contain acid or ingredients that damage the skin.

● Effectively treat an array of skin problems: Acne, Acne scar, Pigmentation, Pimple, Whelk, Blackheads, Whiteheads, Large pores, Papules, Anti-Aging, Anti-wrinkle regeneration, Fine Lines, Blemishes, Lightens skin, Melanin, Sensitive skin, Water and oil balancing.

Improve acne prone skin  
Improve acnes bacteria  
Fade acne marks and scarring

# How to Use SQT® Spongilla Spicules Set ☰

\*It is best to use the SQT® Spongilla Recovery Set immediately after Spongilla Spicules Therapy, which can help the skin to reduce discomfort and recover faster.

**1** After cleaning the face with a gentle cleanser, mix the Spongilla Spicules powder and serum in a bowl or mix the essence into Spongilla Spicules and shakeup. Apply to the entire face evenly and softly, avoiding the delicate eye area.

**2** Gently press for 5-15 minutes to absorb Spongilla Spicules deeply into the skin. Spray or keep applying moisturizing water on the face to avoid dry skin. (For oily and combination skin, apply gently to medium pressure for 10-15 minutes. For dry, sensitive skin, apply gentle pressure for 5-10 minutes.)

**3** Apply SQT® Repairing Mask for 15-20 minutes after cleansing the face with purified water.

**4** After removing the mask, clean up with purified water – an optional LED should be done at this point.

# SQT® Anti-Aging Rejuvenation Set ☰

## SQT® Anti-Aging Rejuvenation Set

- Content :**
- 4vials\*5g SQT® Biomicroneedling Firming Cream
  - 4vials\*5ml SQT® Firming Rejuvenation Essence
  - 4pcs\*25ml SQT® Firming Repair Mask
  - 4vials\*5g SQT® Firming Rejuvenation Cream

**Dimensions:** 270mm\*193mm\*33mm  
**Net:** 600g

## SQT® Anti-Aging Rejuvenation Set

### Skin Type:

Oily skin  
Dry skin  
Sensitive skin  
Combination skin

### Efficacy:

Anti-aging  
Smooth wrinkles  
Firming and lifting  
Improve skin elasticity  
Remodeling and rejuvenating

## How to Use SQT® Anti-Aging Rejuvenation Set

- 1** SQT® Biomicroneedling Firming Cream (Application time: 5-10 minutes, depending on client's tolerance level)  
After cleansing, take a vial of SQT® Biomicroneedling Firming Cream, apply half of the amount evenly to the face and press gently in circular motions for 3-5 minutes, then apply the remaining half evenly to the face, continue to gently press in circular motions for 3-5 minutes, then clean with purified water.
- 2** SQT® Firming Rejuvenation Essence (Application time: 10-20 minutes)  
Take an appropriate amount of SQT® Firming Rejuvenation Essence to the entire face, apply a lifting massage and leave to absorb into the skin, then repeat the above actions until the entire vial has been applied, taking approximately 10-20 minutes.
- 3** SQT® Firming Repair Mask (Application time: 15-20 minutes)  
After using the SQT® Firming Rejuvenation Essence, directly apply the SQT® Firming Repair Mask without cleansing. After 15-20 minutes, remove the mask and clean the face with pure water.
- 4** SQT® Firming Rejuvenation Cream (Application time: 1 minute)  
Apply an appropriate amount of SQT® Firming Rejuvenation Cream evenly on the face, gently massage until absorbed. The remaining cream can be used as a final step after your daily skincare routine.

# SQT® Spongilla Recovery Set

## SQT® Spongilla Recovery Set

### Content :

10vials\*100mg SQT® Antiallergy Repair Lyophilized Powder

## Symptoms after SQT<sup>®</sup> Spongilla Therapy

## Symptoms after SQT<sup>®</sup> Spongilla Therapy

\*What may happen after spongilla spicules therapy (depending on the individual ):

### REDNESS

Most people will be red. Some people will be red for 1~2 days. This is a normal reaction that dead skin cells are metabolized.

### DRYNESS

The skin will be relatively dry for a few days after the treatment because of the skin cell renewal process. When the skin is renewed, the skin is very dry and needs a lot of supplementary moisture and nutrition.

### ITCHING

Itching indicates that the original skin is very poor, and any dirt in the skin has not been discharged properly. Under the action of spongilla spicules therapy, the speed is accelerated. Another reason for itching is that the skin is generating new cells. You can pat with pure water instead of rubbing hard with your hands.

### PEELING

Due to the accumulation of old keratinous skin, and other problematic skins, there will be varying degrees of stratum corneum renewal and peeling in different situations.

### ACNE AND BUMPS

For skin with acne and closed pustules and papules, a large number of acne and closed acne may be discharged on the third day, which is the normal manifestation of discharge and nothing to worry about, the skin is simply purging.

# 06 SQT® After Care

## SQT® After Care

- 1 Lightly cleanse your face with clean water for 2 days after SQT® Spongilla Spicules Therapy.
- 2 Use a hypoallergenic cleanser for 3-5 days after using SQT® Spongilla Spicules. Prohibit using anything containing alcohol, face wipes, tissue, soap, or any other exfoliating products and products with pellet/grain (scrubs)
- 3 Use the SQT® Spongilla Recovery Set twice daily for five days after the SQT® Spongilla Spicules treatment, followed by your daily skin care routine.
- 4 You can pat the itchy skin with lotion/toner or wet your face with cotton pad accordingly. Do not scratch the dry and itchy areas to avoid discomfort making it feel worse.
- 5 Peeling will appear on the third day after treatment, please do not peel off forcefully with your hands, instead, moisturize the skin thoroughly. If you remove dead skin cells forcefully, the skin may scars or become troublesome.
- 6 Make sure to protect the skin and avoid the sun after treatment. Always apply a non-irritating sunscreen as skin is very sensitive to UV rays after the procedure. (Freckles or pigmentation might occur when skin exposed to the sunlight without applying sunscreen.)

# 07 Cautions

## Cautions

- 1** This product is not suitable for people with autoimmune system disorders, thyroid disorders, cardiovascular disorders, heart disease and those who are unable to undergo skin-breaking treatment.  
Customers with broken or injured skin that have used strong acidic products in the previous 2 weeks are forbidden to use Spongilla Spicules.
- 2** It is not recommended to use spongilla spicules on skin that is prone to any facial allergies. If allergic, pls patch test and try it on the cheek first. If any irregular swelling on trial, please remove immediately and stop using.
- 3** We recommend spongilla spicules should be used after 1 month of having any of the following procedures: Micro Fractional Laser, Laser Resurfacing, Thermacool, Botulinum Toxin, Hyaluronic acid dermal fillers treatment, Picosecond laser, Ablative Chemical Peels, Traditional Microneedling etc. since the skin is stimulated after these treatments.
- 4** Make sure to protect the skin and avoid the sun after treatment. Always apply a non-irritating sunscreen as skin is very sensitive to UV rays after the procedure. (Freckles or pigmentation might occur when skin exposed to the sunlight without applying sunscreen.)

# 08 Q & A

## Q & A

### Q1. Can I use it on **sensitive skin**?

A. It can be used for sensitive skin too unless they are allergic to spicule. This product does not cause skin allergies, instead, improving it and making the skin healthy. It is not recommended for people with severely thin skin layers.

### Q2. How long will achieve the **effect**?

A. Depends on the specific skin problems. Generally, common skin conditions such as pimples and acne prone skin takes 1~2 sets, more serious problems which require skin strengthening requires 3~4 sets, while those with wrinkles, large pores, skin damage etc needs 4 sets.

### Q3. Can spongilla spicules therapy be used with **other skin care products**?

A. You can use non-irritating functional products for skin problems that customers need to improve, because the micro needles open the skin channels, promote the absorption of functional products. We recommend gentle cleansers and low molecular weight Hyaluronic Acids and other soothing ingredients immediately after treatment and for the following week after.

Q4. Is it safe for **breastfeeding women**, people who **suffering diabetes** or **undergoing chemotherapy**?

A. Yes. But they may be very sensitive to everything, it is best to consult a doctor before receiving treatment.

Q5. Will everyone **peel** off after the treatment?  
Does peeling mean its going to give a good result?

A. According to feedback from 1132 customers we received, 26.24% of users peeled for the first time, 63.78% of users peeled for the second time, 79.15% of users peeled for the third time, and 90.19% of users peeled for the fourth time.

B. The degree of peeling depends on the intensity of facial massage and personal skin types. The peeling part means that the area regenerates faster, so you can see obvious peeling. The non-peeling area may be that the renewal speed is relatively slow, so no obvious peeling can be seen.

Q6. **Who is not suitable for SQT<sup>®</sup> spongilla spicules therapy?**

A. This product is not suitable for people with autoimmune system disorders, thyroid disorders, cardiovascular disorders, heart disease and those who are unable to undergo skin-breaking treatment.

We do care, You deserve better
